

Your Backyard

Here is a list of things that

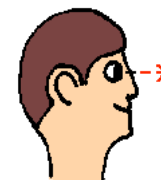

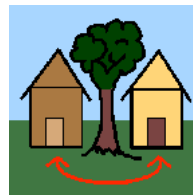

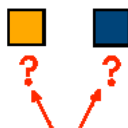

would be needed in a park or

backyard for animals and plants to live.

Take it home and look in

your backyard or neighborhood. See

what is in the habitat. Make a checkmark

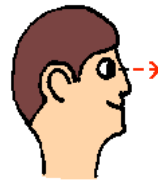

by

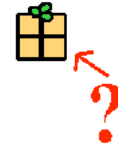

everything

you

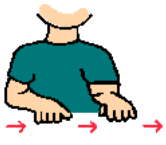

see.

What

animals

do

you

know

live

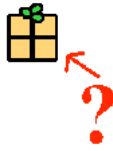

in

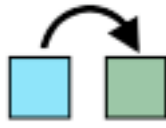

that

habitat?

What

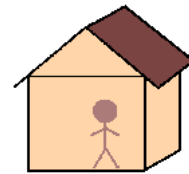

other

animals

could

live

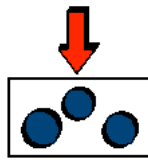

there?

I

found

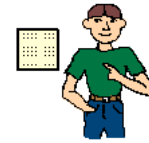

these

things

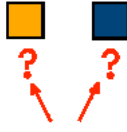

in

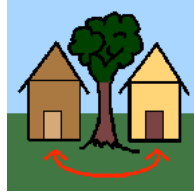

my

backyard

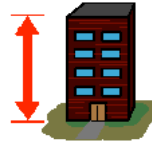

or

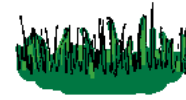

neighborhood:

trees

tall

grass

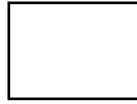

soil

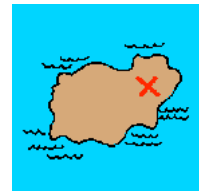

flowers

holes

hiding

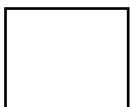

places

water

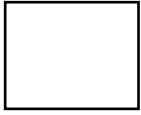

seeds

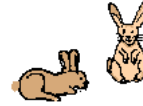

rocks

The animals that live here are:

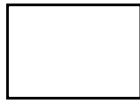

birds

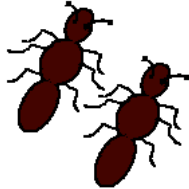

rabbits

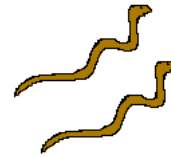

squirrels

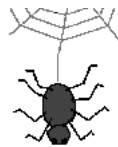

mice

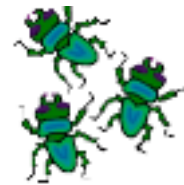

ants

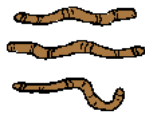

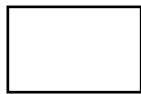

snakes

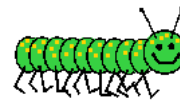

spiders

beetles

worms

caterpillars

ladybugs

bees

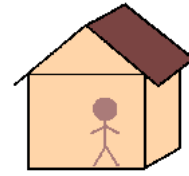

I

think

a \_\_\_\_\_

could

live

here

because \_\_\_\_\_ .
